PRAVEEN KUMAR S

Software Engineer

7558169247 praveenkumarselvan02@gmail.com Bangalore karnataka

ABOUT ME

Dynamic Software Developer with 4+ years of experience in Front-End and Android Application Development. Possesses 3+ years of expertise in developing responsive web applications using modern front-end technologies and 1 year of experience in Android application development. Skilled in designing user-friendly interfaces, optimizing application performance, and delivering high-quality software solutions. Strong problem-solving abilities, teamwork, and a commitment to building scalable and efficient applications that meet business requirements.

WORK EXPERIENCE

Nextbrain Technologies Pvt Ltd – Bengaluru, India

Software Engineer / 2022 – Present

- Developing and maintaining static and dynamic web applications using Next.js, Node.js, and Strapi, improving platform scalability and handling capacity by 30%.
- Building responsive, user-centric interfaces with HTML, CSS, JavaScript, and React.js to deliver high-fidelity designs.
- Collaborating with UI/UX designers and backend teams to deliver full-stack applications, reducing project delivery times by 15%.
- Integrating REST APIs for seamless data handling, optimizing API response consumption, and ensuring a 20% decrease in client-side loading times.
- Continuously optimizing production code and implementing frontend best practices to boost core web vitals and long-term application scalability.

Android Developer / 2021 – 2022

Nextbrain Technologies Pvt Ltd – Bengaluru, India

- Designed, developed, and maintained Android applications using Kotlin and Java, prioritizing user experience and functionality.
- Collaborated with cross-functional teams to define, implement, and ship new features that enhanced app usability.
- Optimized app performance to ensure seamless operation across diverse devices, resolving critical performance issues.
- Contributed to delivering engaging, high-quality mobile applications that reached global users.

SKILLS

- Programming Languages: Java, Kotlin, JavaScript, TypeScript, Python, HTML5, CSS3
- Frameworks & Libraries: React.js, Next.js, Redux, Strapi, Bootstrap
- Mobile Development: Android Development, Android Studio, Jetpack Compose, Firebase, Retrofit
- Frontend Development: Responsive Web Design, UI Development, Cross-Browser Compatibility, REST API Integration
- Tools & Technologies: VS Code, Visual Studio, Git, GitHub, GitLab, Postman, SonarQube
- Platforms: Linux, Windows
- Architecture Patterns: MVC, MVP, MVVM
- Specializations: Mobile Application Development, Frontend Development, API Integration, Performance Optimization

---

PROJECTS

Silicon Drive Feb 2026 - Present

- Silicon Drive is a corporate cab booking and transportation management platform designed to provide safe, reliable, and cost-efficient employee travel solutions for businesses.

Machfox Nov 2025 - Feb 2026

- The Service Management System for Railway Contracts is designed to manage end-to-end operations of service contracts awarded by railway departments. The system ensures efficient planning, execution, monitoring, and compliance of contracted services such as maintenance, operations, staffing, and infrastructure support.
- It provides centralized control over contracts, zones, divisions, departments, workforce, service schedules, performance tracking, and reporting, ensuring transparency and accountability.

Intra 3.0 June 2025 - Jan 2026

- Developed an internal workflow and performance management system using React.js and Redux, enabling staff onboarding, role-based access, activity tracking (meetings, feeds, surveys), and opportunity-based task management through responsive and reusable UI components.
- Implemented dynamic DOM manipulation and performance dashboards to automate task tracking, rewards, and salary hike calculations based on target completion, improving workflow efficiency and user experience.

Edubotix March 2025 - Present

- Building a comprehensive web application to digitize school and college data, developing responsive frontend modules for real-time attendance tracking and automated reporting.
- Designing and implementing user interfaces for an exam question bank and mock test results portal, while ensuring secure handling of sensitive institutional records.

Shell Oman Feb 2024 - March 2025

- Integrated a real-time AI CCTV analytics platform supporting smart city, retail, and manufacturing deployments into a responsive user interface.
- Developed a real-time monitoring dashboard to visualize multi-camera video processing, object detection, face recognition, and tracking data (utilizing backend feeds from YOLOv11, RetinaFace, ArcFace, and Byte Track).
- Collaborated with AI/Backend teams to display optimized model inference metrics, ensuring seamless frontend video streaming and dashboard rendering speed.
- Utilized Docker and modern frontend optimization techniques to ensure the tracking dashboard loaded efficiently for end-users.

AtMed Healthcare Role April 2023 - june 2024

- AtMed Healthcare is an Android application offering a comprehensive platform for patients to manage their healthcare needs, including connecting with doctors, booking diagnostic tests, accessing medical equipment, maintaining health records, and exploring wellness resources. As part of the maintenance project, I actively work on enhancing existing features, resolving bugs, and ensuring the application functions seamlessly.

EDUCATION & CERTIFICATIONS

- AWS Certified Cloud Practitioner | Sep 2024
- B.Tech in Solar and Alternative Energy | Vinayaka Mission's Kirupananda Variyar Engineering College | 2018 - 2021
